

OILHACK

## The Artist: "OILHACK"

Multidisciplinary visual artist, specialized in Organic Art Creation (artistic videography, live performance, immersive large-scale exhibitions, commercial customized content for brands)

*"Art is for me a way to thank life, a way to share without limits, beyond any border. Color is my language to continue exchanging freely," Oilhack confides.*

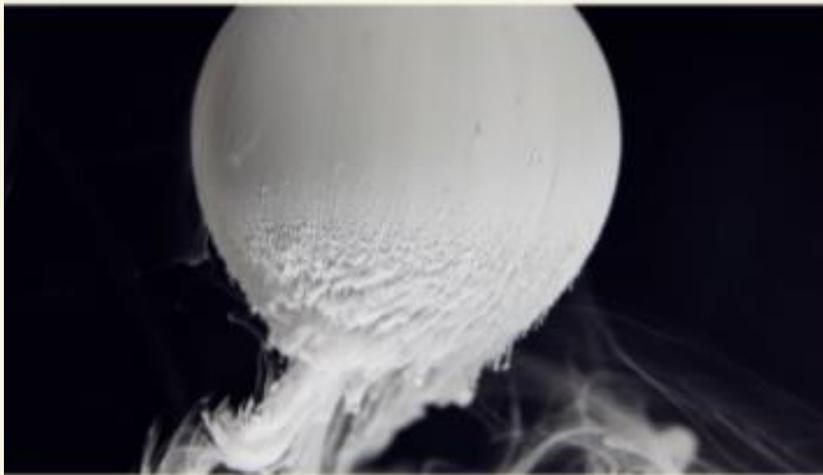

Inspired by nature since childhood, Oilhack's creations are an alchemy of colors, materials, textures; An alloy of energies which come to life on its support. It is the movement and assembling which creates diversity.

His work is the result of combinations of over ten years of artistic practices, exploration, experimentation and research, seized at a precise moment, then captured, emphasized, enhanced via macro art photography. Indeed, his camera rapidly became his best ally and release, in a constant desire of new experiments to be shared.

By working with natural mediums for live realizations, immediate and short-lived as life is, what he creates is more or less like a hypnotic fluid mandala offering him an immense field of exploration which is just waiting to be discovered.
